

DIGITAL LIBRARY PROJECT ASSIGNMENT

A digital library is a collection of textual and numeric data, scanned images, graphics, audio and video recordings that provides users with access to digital collections for ease of information retrieval (Kalpalatha 2015). Just as a financial plan helps a business secure its future, a digital library plan ensures that information resources are accessible, well-organized, and user-friendly for its intended audience.

In this assignment, you are required to create a digital library for an identified target group of your choice (e.g., students, researchers, community members, children, or professionals). You must first choose a type of library (e.g., public library, academic library, special library, school library) and give your digital library a suitable name. Your digital library must be developed using any open-source digital library software (e.g., Wax, Greenstone, DSpace, Omeka, etc.) and should integrate metadata usage and user interface design principles.

Assignment Instructions

Creation of Your Digital Library

Using **open-source digital library software**, build a digital library that includes:

1. **Metadata Application** – Assign metadata to at least five items.
2. **Core Principles of User Interface (UI) Design** – Apply at least three principles, such as:
 - **Simplicity**
 - **Consistency**
 - **Feedback**
 - **Visibility**
3. **Search and Browse Functionality** – Ensure users can retrieve information easily.
4. **Online Demonstration (Recorded)** – Each group must record a live online demonstration of their digital library (e.g., via MS Teams), walking through the metadata applied, the UI design principles used, and the search/browse functionality. All group members must have their **cameras switched on** for the full duration of the recording and must each speak to the part of the project they worked on. The recording should be no longer than **10 minutes** and must be submitted to Moodle together with the digital library files. Demonstrations without visible cameras will not be accepted as valid proof of participation.

Your digital library must be uploaded to your Moodle classroom by Friday, **29 September 2026, 12h00 (Midday)**.

In addition to uploading your files to Moodle, each group must provide a working **link** to their hosted digital library website as part of their submission, so that the lecturer can access and browse the live collection directly.

Due date: 29 September 2026 at 12h00 midday (no late submissions will be accepted).

Submission: Done by one member (group leader).

**APPENDIX A: GROUP PLAGIARISM STATEMENT FACULTY OF
ACCOUNTING AND INFORMATICS DEPARTMENT OF INF SYSTEMS**

Group Plagiarism Statement

You are guilty of plagiarism if you copy something from a book, article, or website without acknowledging the source and passing it off as your own. In effect, you are stealing something that belongs to someone else. This is not only the case when you copy work word-by-word (verbatim), but also when you submit someone else's work in a slightly altered form (paraphrase) or use a line of argument without acknowledging it. You are not allowed to use another student's past written work. You are also not allowed to let anybody copy your work to pass it off as his/her work.

Students who commit plagiarism will get 0 (zero) for the plagiarized work, without the opportunity to resubmit AND the matter may also be referred to the Dean for disciplinary action. Plagiarism is regarded as a serious contravention of the rules and can lead to expulsion from this and other universities.

This declaration must be completed and submitted to your respective group lecturer for all phases of the project

1. We understand what plagiarism is and we are aware of the DUT'S policy in this regard.
2. We declare that this tutorial/project is our work.
3. Where other people's work has been used (either from a printed source, the internet, or any other source) this has been carefully acknowledged and referenced following departmental requirements.
4. We have not used other students' past work to hand in as our own.
5. We have not allowed and will not allow anyone to copy our work to pass it off as their work.
